

Evoting System (Group Project)

Overview :

The Evoting System is a secure and user-friendly platform that allows administrators to manage elections, candidates, and voters efficiently. Voters can register, log in, and cast their votes in a seamless and secure environment. The system supports multiple features to enhance the voting process, ensuring transparency, accessibility, and ease of use.

Useful Links:

App URL : <http://shrutivotes.infinityfreeapp.com/>

Github repo : <https://github.com/Shruti1suman/Evoting-system.git>

Features :

- Admin Panel
 - Election Management: Create, and delete elections.
 - Candidate Management: Add and remove candidates for each election.
 - Adding new Voter : Approve Voters application.
 - Approving voter's request for editing their details.
 - Election Analytics: View election results, voter turnout, and detailed reports after election.
-
- Voter Panel
 - Voter Registration: Voters can self-register, subject to admin approval.
 - Secure Login: Voters log in securely after being approved by the admin.
 - Voting: Cast votes in available elections with a simple and intuitive interface.
 - Voter Dashboard: View upcoming elections, and enable voter to vote the candidates of elections.

Technologies Used

- HTML, CSS, JavaScript (Frontend)
- PHP (Backend)
- MySQL (Database)
- InfinityFree (Hosting)

Installation

To run this project locally:

1. ****Clone or download the repository.****
2. Copy the project files into your web server's root directory. If using XAMPP, place it inside the `htdocs` folder.
3. Import the database:
 - Open phpMyAdmin
 - Create a database named `evoting` (or your preferred name)
 - Import the provided `.sql` file into the database
4. Update your database connection in `config.php`:

```
```php
$conn = mysqli_connect("localhost", "root", "", "evoting");
```

## Usage

### Admin role :

- Click on Login and choose to Login as Admin.
- Fill Admin ID as "Admin" and Password as "admin156" (!!! IMPORTANT !!!)
- Add Election and create new election with valid dates.
- Add Candidates for new Election.
- Add Voters with validating the details with eligibility of voting.
- Check if any voter has requested for there voter ID updates.
- Admin can delete Election, Candidate or Voter.

### Voter role :

- After installing the project, User get the access of Homepage.
- Click o Apply for registering as new voter.
- Fill the required informations for Voter.
- Check the Voter List from Navbar of homepage frequently.
- Get voter ID if approved by the Admin.
- Use Voter ID and Password for login as Voter.
- Get the Elections to be voted in on Voter Panel.
- Choose Candidate to be voted for and Do Vote.
- Wait for Election to be ended and See the result on homepage.

### My Contribution :

- Added the feature for Applying as new Voter.
- Requesting an update in existing voter Id details.
- Admin approving new Voter and update request.
- Declaring result for Elections.
- Viewing result report in Votes no. and percentage to each candidate.
